Equivalence requires reading to be +/-15% of OEM supplied friction material
Data was collected from the Performance Review and OEM & AM Websites.

Coefficient of Friction range covered .40 to .52

SAE J661 Chase test reference FMP: CM7613/5

FMVSS 121D Test reference Greening: M20-013-06

All our friction material formulas will perform to within +/- 20% of all the competitors products we have tested
We have little wear performance data on many of these materials so cannot make any claims in the regard.
